

Case Summarization and analysis

...

OBJECTIVE

- To improve the way Legal Documents and Terms and Conditions contracts are presented and analyzed.
- Provide a comprehensive and easy to understand summary of legal documents and analytics of the text, allowing a deeper insight into it for the reader

The Problem

- Legal document are often too long, tedious and confusing.
- Some terms and conditions can be easily overlooked.
- Predatory agreements can legally entrap people
- Time consuming and often has insignificant details.
- Legal jargons cannot be understood by the average human

OUR SOLUTION

We present a web application that accepts a legal document (preferably proceedings of a court case, terms and conditions document) IN TXT FORMAT, and using various Artificial Intelligence, Machine Learning and Natural Language Processing Algorithms, comprehends it and generates a concise summary of the document and recognises the key legal points (for instance, names and locations involved, important sentences).

We also provide a plugin version specifically trained for privacy condition summarization which provides an analysis of the complexity and readability of the terms and the most important sentences in the document

OUR SOLUTION

Usage

Just upload the legal proceedings of the case *IN THE FORM OF A TXT FILE* (no other formats are supported as of now).
We then provide you with the following:

Original Document With Highlighting

We identify the key points and highlight them, making you focus more on the important things when reading a large legal document

Summarized Document

We comprehend the document and prepare a concise summary that briefs you on the sum and substance of the document

QnA Bot

Our Question Answer bot answers some simple queries about the document. It can list the important points, give you a very short rundown of the document or summarise it in a little more detail.

You **agree** that your use of the Services is at your own risk, and that you will not use the Services to violate any applicable law, regulation, Event policies, or instructions as outlined in these Terms and you will not encourage or enable any other individual to do so.

You will not trespass, or in any manner attempt to gain or gain **access** to any property or location where you do not have a right or permission to be, and will not otherwise engage in any activity that may result in injury, death, property damage, nuisance, or liability of any kind.

You also represent and warrant that neither your **User Content**, nor your use and provision of your **User Content** to be made available through the **Services**, nor any use of your **User Content** by Niantic on or through the **Services** will infringe, misappropriate or violate a **third party**'s intellectual property rights, or rights of publicity or privacy, or result in the violation of any applicable law or regulation.

Niantic and its authorized third parties reserve the right to refuse admission to, or to remove from an Event without refund or compensation of any kind, any person that (a) does not comply with these Terms, (b) engages in disorderly conduct or willful misconduct, or (c) Niantic or its authorized third parties believe will cause a negative effect on the Event, participants, spectators, and/or personnel.

Such **third party** services may affect your ability to utilize the **Services** or participate in an Event and you hereby waive and release Niantic and any other party involved in creating or delivering the **Services** from all claims, demands, causes of action, damages, losses, expenses or liability which may arise out of, result from, or relate in any way to such **third party** services.

Notwithstanding this arbitration agreement, Niantic reserves the right to bring an action in any court of competent jurisdiction against you to stop and/or seek compensation for the intentional or willful crimes or abuse of a. Without limiting the

DELIVERABLES

A webapp to upload the legal documents and get abstractive and extractive summaries.

An interactive chatbots to ask queries regarding the document.

Informatics regarding the document.

A plugin that gives the relevant important information for terms and conditions documents.

Highlighted Keywords in the document.

SOFTWARE REQUIREMENTS - WEBAPP

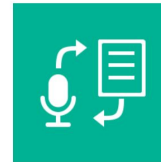

This is used for the frontend for the web page and to provide the required functionality

It is a Python-based free and open-source web framework, which follows the model-template-view architectural pattern. We use this for development of our application.

Language Understanding (**LUIS**) is a cloud-based API service that applies custom machine-learning intelligence to a user's conversational, natural language text to predict overall meaning, and pull out relevant, detailed information. This is used for the chatbot framework and is trained on specific arguments

Microsoft Bing Speech API is a cloud-based API that provides advanced algorithms to process spoken language, it allows developers to add speech-driven actions to their applications including real-time interaction with the user. This is used for Speech to Text and Text to Speech, thus enabling the bot to work with voice as well

Libraries for making model

Microsoft **Program Synthesis**
using **Examples SDK**

Given a domain-specific language (DSL) and input-output examples for the desired program's behavior, PROSE synthesizes a ranked set of DSL programs that are consistent with the examples. This is used for the key highlights of the document.

SOFTWARE REQUIREMENTS - PLUGIN

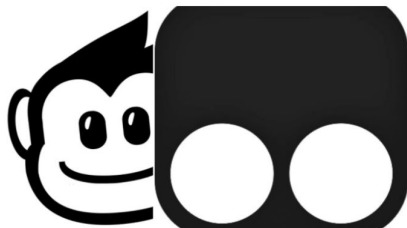

This was used for the frontend for our application

Flask

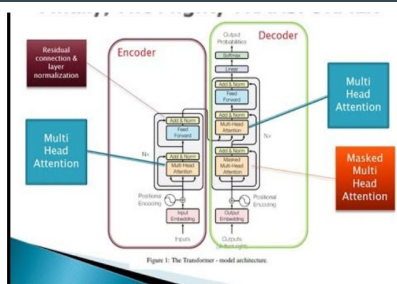

Flask is used for the backend server which communicates with the front-end through REST API

TamperMonkey was used as the userscript to create the required plugin for our application

PYTORCH

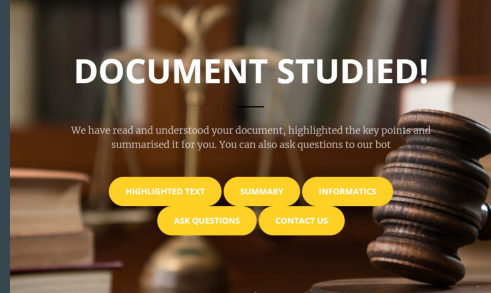

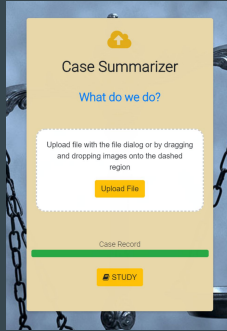

Pytorch was used for the creation of the Transformer Model and extractive summarizer

BERT is used as a transformer model, fine tuned to the specific domain and thus it helps us better understand legal data
